SUMMARY

Mid-level backend engineer specialising in Go microservices and distributed systems. Four years of production experience with gRPC, NATS, and CockroachDB. Comfortable leading technical design discussions and shipping independently.

SKILLS

Go, gRPC, NATS, CockroachDB, PostgreSQL, Docker, Kubernetes, Prometheus
AWS ECS, REST APIs, OpenTelemetry

EXPERIENCE

Software Engineer - Cockroach Labs (2022 - present)

- *Developed a distributed job-scheduler in Go, coordinating work across 200+ nodes with sub-second scheduling latency.
- *Reduced gRPC connection overhead by implementing connection-pool reuse, saving 15% CPU across the cluster.

Junior Software Engineer - Convoy (2020 - 2022)

- *Owned a freight-matching microservice used by 3 000 trucking companies, maintaining 99.9% availability.
- *Introduced structured logging with OpenTelemetry, cutting mean-time-to-debug from hours to minutes.

EDUCATION

BSc Software Engineering - University of Washington (2020)

CERTIFICATIONS

Certified Kubernetes Application Developer (CKAD)

LANGUAGES

English (native)
