SUMMARY

Full-stack engineer with five years delivering SaaS products on Node.js and React. Equally comfortable in a backend API or a React component tree. Passionate about developer experience, clean APIs, and shipping features users notice.

SKILLS

Node.js, Express, React, TypeScript, PostgreSQL, Prisma, Redis, Docker
GitHub Actions, Jest, REST APIs, GraphQL

EXPERIENCE

Full-Stack Engineer - Monzo (2022 - present)

- *Built a self-serve analytics dashboard with Node/React that replaced 30 hours of manual weekly reporting.
- *Designed a Prisma-based multi-tenant data model supporting 200 k business accounts.

Software Engineer - FreeAgent (2019 - 2022)

- *Delivered a VAT-filing integration with HMRC's Making Tax Digital API on a hard regulatory deadline.
- *Improved CI pipeline reliability by adding retry logic and parallelising test suites, cutting flakiness by 80%.

EDUCATION

BEng Software Engineering - University of Edinburgh (2019)

CERTIFICATIONS

AWS Certified Developer - Associate
