SUMMARY

Android engineer with four years of experience building Kotlin-first apps. Strong advocate for Jetpack Compose and clean architecture. Contributed to open-source Compose libraries with 2 k GitHub stars.

SKILLS

Kotlin, Jetpack Compose, Coroutines, Room, Hilt, Retrofit, Firebase, JUnit
Espresso, Gradle, Android Architecture Components, Material Design 3

EXPERIENCE

Android Engineer - Blablacar (2022 - present)

- *Migrated the booking flow from XML layouts to Jetpack Compose, improving render performance by 30%.
- *Built a local-first offline mode using Room and WorkManager, eliminating user complaints about poor connectivity.

Junior Android Developer - Deezer (2020 - 2022)

- *Implemented a Hilt-based dependency injection refactor across 40 k lines of legacy code.
- *Added deep-link support for 15 in-app destinations, enabling targeted marketing campaigns.

EDUCATION

MSc Mobile Computing - Universite Paris-Saclay (2020)
