SUMMARY

Senior data engineer with 7 years designing large-scale batch and streaming pipelines. Deep expertise in Spark, Airflow, dbt, and Snowflake. Reduced data-warehouse compute costs by 60% at two different companies through query and partition optimisation.

SKILLS

Python, Apache Spark, Apache Airflow, dbt, Snowflake, BigQuery, Kafka, Terraform
AWS Glue, Redshift, SQL, Great Expectations, Docker, Looker

EXPERIENCE

Senior Data Engineer - Grubhub (2020 - present)

- *Designed a Spark-on-EMR pipeline ingesting 2 billion events/day with SLA-compliant 15-minute latency.
- *Introduced dbt transformations that replaced 4 000 lines of stored procedures, cutting model run time by 45%.
- *Led a Snowflake cost-reduction initiative saving \$400 k/year through clustering key redesign.

Data Engineer - Morningstar (2017 - 2020)

- *Built an Airflow-orchestrated financial data pipeline from 50 market data vendors with automated reconciliation.
- *Implemented Great Expectations data-quality checks that caught 3 production data incidents before they reached analysts.

EDUCATION

MSc Data Science - University of Illinois Chicago (2017)

CERTIFICATIONS

dbt Certified Developer | Snowflake SnowPro Core
