SUMMARY

Principal cloud architect with 12 years designing multi-region, highly available platforms on AWS and Azure. Led architecture for fintech platforms processing \$5 B+ in annual transactions. Trusted advisor to CTOs and Engineering VPs.

SKILLS

AWS (20+ services), Azure, Terraform, Pulumi, Service mesh (Istio), Event-driven architecture, Domain-driven design, Cost optimisation

Security architecture (Zero Trust), Chaos engineering, FinOps, Architecture review boards, Stakeholder management

EXPERIENCE

Principal Cloud Architect - Klarna (2018 - present)

*Architected a multi-region active-active payment platform that survived a full EU-WEST-1 AZ failure.

*Drove FinOps programme reducing annual AWS spend by \$2.3 M without performance regression.

*Chaired the Architecture Review Board, reviewing 30+ system designs per quarter.

Senior Cloud Engineer - iZettle (acquired by PayPal) (2013 - 2018)

*Built the core payment processing platform from 10 k to 1 M daily transactions.

*Introduced chaos engineering practices via AWS Fault Injection Simulator across 8 teams.

EDUCATION

MSc Computer Science - KTH Royal Institute of Technology (2013)

CERTIFICATIONS

AWS Certified Solutions Architect - Professional | AWS Certified Security Specialty | Google Professional Cloud Architect
