SUMMARY

Application security engineer with five years hardening web services and cloud infrastructure. Experience in threat modelling, SAST/DAST tooling, and penetration testing. Passionate about shifting security left in CI/CD pipelines.

SKILLS

OWASP Top 10, Threat modelling (STRIDE), Burp Suite, SAST (Semgrep, SonarQube), DAST (OWASP ZAP), AWS IAM, Secrets management (Vault), Python
Bash, Container security (Trivy, Falco), Incident response, Bug bounty

EXPERIENCE

Application Security Engineer - Glovo (2022 - present)

- *Embedded Semgrep SAST into CI pipelines across 60 repositories, catching 200+ vulns before merge.
- *Led threat modelling workshops for 5 product squads, resulting in 35 actionable security improvements.

Security Analyst - PwC Spain (2019 - 2022)

- *Conducted 30+ penetration tests for financial and healthcare clients, delivering CVSS-scored reports.
- *Discovered a critical SQL injection in a FTSE 250 client's login page during a black-box engagement.

EDUCATION

MSc Cybersecurity - Universitat Politècnica de Catalunya (2019)

CERTIFICATIONS

OSCP | CEH
