SUMMARY

Mid-level game developer with four years shipping mobile and PC titles using Unity. Strong in gameplay systems, shader programming, and multiplayer netcode. Shipped three games with aggregate 5 M downloads on iOS and Android.

SKILLS

Unity, C#, HLSL (shader programming), Photon Fusion (netcode), Addressables, DOTS (basic), Game design patterns, Git
PlayFab (live-ops), UI Toolkit, Physics (Unity Physics)

EXPERIENCE

Game Developer - Jam City (2022 - present)

- *Led gameplay programming for a match-3 mobile game that reached #8 on the US App Store charts.
- *Implemented a server-authoritative Photon Fusion multiplayer mode for a co-op puzzle game.

Junior Unity Developer - Scopely (2020 - 2022)

- *Built procedural level generation system producing 10 000 unique dungeon layouts.
- *Optimised draw calls from 800 to 120 per frame, enabling smooth 60 fps on mid-range Android.

EDUCATION

BSc Computer Science (Games) - USC Viterbi School of Engineering (2020)

LANGUAGES

English (native) | Mandarin (conversational)
